Title: SYSTEMS ENGINEER, SR.

Pay Range: Pending Experience Verification and contractual requirements

Benefits: TBD

Projected Hours: 40/week (Hours will fluctuate with and are dependent on work received from prime contractor. No guarantee of hours made).

Date: Immediate (pending notice to proceed from Prime Contractor)

FLSA Status: Exempt

Job Summary: Undergraduate degree in computer science or related field. Experience as a SharePoint developer skilled in .NET, C#, SharePoint Portal Server 2003, HTML, CSS, and JavaScript. Past experience dealing with DoD or government clients is desirable.

Knowledge, Skills, and Abilities

- Under minimum supervision, assesses highly complex problems and investigates, develops, appraises, selecting, and presents solutions.
- Exercises independent judgment in the performance of duties, which require an interdisciplinary approach using principles of economics, engineering, computer science, lifecycle analysis, and human behavior.
- Performs complex work involved in specifications development, implementation, testing and documenting engineering systems and equipment.
- Initiates concept development and trade-off studies.
- Consults extensively with customer representatives and employees.

Credentials and Experience

- **Must have demonstrated SharePoint experience.**

Special Requirements

- Must be able to learn fast, adapt to change, adapt to workload and think through tasks in a logical manner. Interface requirements will require contact with persons outside our company (our prime contractors and government personnel) so professional presentation and attitude is very important.
- Candidate does not require but **must** be able to attain a security clearance to the Secret level.
